Proof of CIA Perfidy

FOREIGN MINISTER Subandrio of Indonesia has been asked to provide proof within a week that the U. S. Central Intelligence Agency was fomenting strikes in the troubled country or be fired. The demand came from thousands of Indonesian students and union members in the capital of Jakarta.

Subandrio was in Peking attending Communist China's birthday celebration when the coup to supplant President Sukarno was staged. Subandrio was on the list of those the rebels called their council. However, Sukarno did not condemn Subandrio, who is also deputy premier

and the top civilian aide to the President.

THE COALITION of Moslems, Christians and labor organizations are getting close to Sukarno when they attack Subandrio. The Army seems to have kept Sukarno as window dressing while it takes over the country in the wake of the coup. If it turns Subandrio out, Sukarno cannot last much longer.

One proof is that the Army has paid no attention to Sukarno's demand that it leave Communists unmolested but has gone on destroying Communist hangouts and control of the country's labor movement and other forces.
